

Santiago Filippone

Product Designer · UX, AI & Design Systems
Buenos Aires, Argentina

CURRICULUM VITAE

Product Designer with 5+ years across fintech, media and high-traffic platforms.

2026

ABOUT

Product Designer with 5+ years of experience designing complex digital products across fintech, media, and high-traffic platforms. Specialized in design systems, DesignOps, and end-to-end product thinking. I use AI tools as part of my daily workflow to document, prototype, and move faster.

EXPERIENCE

2017–2026

Product Designer

Aerolab

2025 — 2026

Worked end-to-end on the redesign of KF Connect, the portal for Kauffman Fellows, a global network of venture capital investors. The main focus was transforming a desktop platform into a mobile-first experience by reorganizing the information architecture and redesigning key flows such as the student section, fellows directory, profiles, and events. Also contributed to other projects such as the redesign of the Essen+ benefits platform, working on sections with complex use cases and sensitive data collection.

DesignOps · UI

Banco del Sol

2023 — 2025

Responsible for the design systems of both Retail Banking and Business Banking products, used by a team of 8+ designers. My work included component creation and maintenance, governance definition, Storybook documentation, and design token management. I coordinated the full lifecycle of new components: request, development, implementation review, updates in existing designs, and team communication. Acted as the main point of contact between design and development for everything related to system consistency and implementation.

UX / UI Designer

Artear

2021 — 2023

Participated in the redesign and launch of four large-scale digital media products. Worked from definition to final design in high editorial demand environments and live coverage scenarios such as the 2021 Elections and the Qatar 2022 World Cup. Contributed to the development of a design system that served as a foundation across all products, enabling component reuse and scalable visual and interaction standards.

Instructor

Government of the City of Buenos Aires

2017 — 2021

Taught Graphic Design and Computer Skills courses at a professional training center, developing materials and supporting each student's learning process.

Web Designer

Freelance

2017 — 2021

Designed and developed e-commerce and web platforms for clients across different industries, managing projects from brief to launch.

RECOGNITION

2022–2023

28th Communicator Awards

2022

Excellence in digital media design and user experience.

The w3 Awards

2022

Awarded by the Academy of Interactive and Visual Arts.

EPPY™ Awards

2023

International journalism awards for the best in digital publishing.
