

Santiago Filippone

Product Designer · UX · Design Systems · AI Workflows

ABOUT

Product Designer with 5+ years designing complex digital products at scale. Background in fintech, banking, and high-traffic media platforms. I work best at the intersection of product thinking, data-informed decisions, and design systems. I use AI tools as part of my daily workflow to move faster and iterate smarter.

EXPERIENCE

Product Designer

2025–2026

Aerolab

- Worked end-to-end on product design for Kauffman Fellows, Essen+, and Santillana from discovery to final delivery.
- Took KF Connect from a desktop-only platform to a mobile-first experience, restructuring the information architecture and redesigning key flows: onboarding, fellows directory, profiles, and events.
- Translated complex requirements into clear, scalable solutions, balancing usability, technical feasibility, and business goals.
- Integrated AI tools into the design process: used Stitch and Figma Make for rapid prototyping and concept testing, and Claude Code to generate documentation and speed up iteration.
- Built and maintained design system components, tokens, and documentation across projects.

DesignOps · UI

2023–2025

Banco del Sol

- Owned the design systems for Retail and Business Banking, used by 8+ designers across multiple squads.
- Managed the full component lifecycle: intake, design, implementation review, updates to existing screens, and communication to the team.
- Defined governance, Storybook documentation, and design token structure to standardize patterns across products.
- Acted as the main point of contact between design and development for anything related to system consistency and implementation.

UX / UI Designer

2021–2023

Artear

- Took part in the redesign and launch of four large-scale digital media products: Todo Noticias (TN), eltrece, Ciudad Magazine, and the TN mobile app, with 285K+ daily active users across Android and iOS.
- Was part of the team that built Brick UI from scratch: a design system to unify visual and interaction standards across all Artear products, connected to the CMS and adapted to high editorial demand.
- The system was used in high-demand scenarios such as the 2021 elections and the Qatar 2022 World Cup coverage.
- The work was recognized with three international awards: 28th Communicator Awards, w3 Awards, and EPPY Awards (2022-2023), and received 3,000+ appreciations on Behance.

Instructor

2017-2021

Government of the City of Buenos Aires

- Taught Computer-Assisted Graphic Design and Technology courses following the curriculum established by the training center.
- Developed teaching materials and provided individualized student support.

Web Designer

2017-2021

Freelance

- Designed and built websites and e-commerce stores using WordPress and Elementor, from layout to launch.
- Worked on SEO optimization and Google Ads campaigns, bringing a performance and acquisition-focused mindset.

RECOGNITION

28th Communicator Awards

2022

Awarded for Best Practices, Best UX, and Best UI for the new liveblogging format on mobile devices.

The w3 Awards

2022

Best Structure and Navigation (Gold + Silver) and Best Use of Streaming Video.

EPPY™ Awards

2023

International journalism awards for the best in digital publishing.
